

When "good" is nowhere near good enough.

Wall-tech, Inc.

"From the solicitation of the bid to the final project, Wall-tech is a very professional company. Bids get turned around quickly, the field crews push the schedule, and the final product is of the highest quality."

— RYAN MARQUARDT  
Engineered Construction, Inc.

#### ST. CATHERINE'S MEDICAL CENTER

GENERAL CONTRACTOR:  
Robins & Morton

WORK PERFORMED:  
Drywall, metal stud framing,  
roof trusses, EIFS, firestopping

#### WESTBROOK CHURCH

GENERAL CONTRACTOR:  
Beyer Construction

WORK PERFORMED:  
EIFS

## "Good is the enemy of great."

That opening line to Jim Collins' bestseller, *Good to Great*, is also the defining truth that has made Wall-tech, Inc. an industry leader in drywall system construction. They have earned the reputation of being #1 in quality in the Midwest for metal-stud framing, drywall, taping, finishing, EIFS, stucco, plaster, fire-stopping, fire-proofing, K-13, and intumescent.

Under the leadership of founder and president, Dale Doering, **Wall-tech, Inc. is committed to greatness** both in the big picture of their company philosophy and in every tiny detail from beginning to end.

#### GREENWAY OFFICE BUILDING— VERTICAL EXPANSION

GENERAL CONTRACTOR:  
Kraemer Brothers

WORK PERFORMED:  
Drywall, metal stud framing,  
panelized roof cornice system,  
EIFS, firestopping

“Wall-tech provides the cooperation and manpower necessary in the field to get things moving, keep momentum, and ultimately make your completion date. The quality of their work is exceptional.”

— TIM BOGENSCHNEIDER  
Tri-North Builders, Inc.

Oscar J. Boldt Construction

**WORK PERFORMED:**  
Drywall, metal stud framing,  
plaster, firestopping

#### EAST TOWN MALL RENOVATION

**GENERAL CONTRACTOR:**  
EMJ

**WORK PERFORMED:**  
Drywall, metal stud framing,  
fireproofing

## A long list of satisfied customers.

Over the years, many people have bought into the misperception that Wall-tech was a one-contractor company. The main reason behind that myth is simple: once a general contractor uses Wall-tech, they tend to become a preferred subcontractor. The result is a steady stream of repeat business from customers who are more than satisfied.

Satisfaction comes not just from great results, but also from a worry-free process along every step of the way—even on projects where huge headaches seem inevitable. In an industry where renovations and expansions are just as common as new constructions, Wall-tech thrives on innovation and adaptability.

Case in point: the Dane County Airport project. Tim Bogenschneider, Project Manager at Tri-North Builders, Inc., was working with the lofty plans of an ambitious architect.

*“At the Dane County Airport, Wall-tech was instrumental in our success at maintaining a difficult schedule on a very complex and detailed open remodel/addition project to the terminal,”* said Bogenschneider. *“The project consisted of multiple overlapping phases that affected about 80-90% of the building while the airport, airlines, and others tenants remained operational.”*

#### DANE COUNTY REGIONAL AIRPORT—ADDITION AND RENOVATION

**GENERAL CONTRACTOR:**  
Tri-North Builders/Gilbane &  
Oscar J. Boldt Construction

**WORK PERFORMED:**  
Drywall, metal stud framing,  
plaster, fireproofing

“Wall-tech has demonstrated a high level of organization and quality workmanship. Their project management and field supervision have been superior with their planning efforts and ability to 'step up' when required to meet project delivery dates.”

— DAN SCHMITZ  
Boldt Construction

#### MIDWEST AIRLINES CENTER

**GENERAL CONTRACTOR:**  
Clark/Hunzinger Construction

**WORK PERFORMED:**  
Drywall, metal stud framing,  
acoustical ceilings, doors/frames,  
Wells Street enclosure systems

That's the type of job when Murphy's Law usually runs rampant. How does a contractor deal with the problems that are sure to pop up? Deal with them before they happen. As Bogenschneider observed, *“Close coordination with and input from Wall-tech's field superintendent helped us identify and solve potential problems. Working with Wall-tech, we were able to drive the schedule and keep each phase and each subcontractor moving toward the common goal of completion.”*

Time and again, Wall-tech, Inc. has shown the ability to turn good projects into great ones. Perhaps nowhere was that more evident than on the project at the Greenway Office Building, where they added four floors to an occupied building while it was still being used. By pre-fabricating the structural stud roof cornice system into panels and erecting it with a crane, they were able to add an 18-foot overhang above a high-traffic area while ensuring maximum safety and pristine quality.

Anyone can see what Wall-tech, Inc. can do by looking at their work. But the true measure of greatness is how a company completes their work, and Wall-tech, Inc. has procedure down to a science. On EIFS jobs, for instance, their 30-point final inspection ensures the utmost quality and endurance for every job regardless of size.

#### FITCHBURG RETAIL MALL

**GENERAL CONTRACTOR:**  
Engineered Construction, Inc.

**WORK PERFORMED:**  
Drywall, metal stud framing

#### HUMMER DEALERSHIP

**GENERAL CONTRACTOR:**  
Miron Construction Co.

**WORK PERFORMED:**  
Drywall, metal stud framing

"I can state without reservation that Wall-tech delivered the finest project gypsum systems of my twenty-year architectural career."

— MATT DUBBE  
Architectural Alliance

## The true measure of success.

The quality of the job is evident to the eye, but the quality of the process comes through in the responses of clients. Ryan Marquardt of Engineered Construction, Inc. said, *"from the solicitation of the bid to the final project, Wall-tech is a very professional company. Bids get turned around quickly, the field crews push the schedule, and the final product is of the highest quality."*

*"It is always a pleasure to work with Wall-tech,"* said Bogenschneider. They are sensitive and responsive to tight schedules. The support from the office is timely and thorough. They provide the cooperation and manpower necessary in the field to get things moving, keep momentum, and ultimately make your completion date. The quality of their work is exceptional. I have worked with Wall-tech on projects varying in size and complexity and never been disappointed.

*"Wall-tech has qualified people at all levels that take pride in their work and it shows."*

Dan Schmitz of Boldt Construction agrees. *"Wall-tech has been a very good addition to our contractor team,"* said Schmitz. *"I would highly encourage you to add Wall-tech to your next project team, they will definitely be able to set the bar for the rest."*

**ALLIANT ENERGY OFFICE BUILDING**
